The Hornets Nest Region, AACA, welcomes you to the Annual Charlotte AutoFair Spring Meet in April. The preservation of our historical vehicles is a strong and growing cause as evidenced by the record group of vendors at Charlotte AutoFair to provide assistance with your projects.

Our Region is certain the Event Program will help to provide sources for what is needed on your project. Don't miss the National AACA Meet!

Hornets Nest members have worked hard for you – please let us know if we can improve anything. Thanks again for being at Charlotte AutoFair.

More than 300 Hornets Nest Region Members
Are part of the organization that Volunteers for
the Production of Charlotte AutoFair in the
Spring and Fall each year.

Mike Munao **Hornets Nest Region** **President**

Welcome everyone to the new and improved Charlotte AutoFair 2025. The Hornets' Nest Region AACA members extend a hardy welcome to all fellow enthusiasts and vendors.

You're invited to the AACA Southeastern Spring Nationals, a significant attraction for the owners of more than 250 show vehicles that will be displayed and judged by AACA guidelines on Saturday. Come join us.

Thousands of hobbyists, car collectors and AACA members attend Charlotte AutoFair to become absorbed in the many unique vehicle interests. In addition to the Hornets Nest Region's production of four (Blue Field is back) Flea Markets, Car Corral, Youth program and the AACA Nationals, there is a gigantic assortment of family fun Speedway activities for everyone. Car collectors and vehicle enthusiasts from all over country travel every year to the fabulous Charlotte AutoFair. Charlotte AutoFair maintains prominence in the collector vehicle sphere and we are delighted to recognize the significant contributions made by all involved in this show.

The Car Corral on the track oval back stretch is truly a great place to find that special car, truck or vehicle. Every vehicle seller in the Car Corral is willing to work personally with a buyer to insure everyone comes out a winner.

A special thanks goes to every Hornets Nest Region member for their dedication, efforts and hard work in producing another great AutoFair. It takes the entire club, all it's members in addition to the Speedway personnel and out of town AACA members to create and manage this terrific show. Thank you again for everyone involved in making our Show/Flea Market a success. We hope this directory helps you navigate your journey through our collector car event.

Again, Welcome to all, have fun, buy hard to find items, purchase that new old car, be thrilled with all the show has to offer – and remember, if you have a question please seek out one of our Yellow Hat club members and we'll be glad to help out any way we can.

Sincerely,

Mike Munao

AACA Southeastern Division Nationals Show Field

Welcome to the Charlotte Area

The Hornets Nest Region extends a cordial Welcome to all fellow AACA members attending the Southeastern Division Nationals. April is a great time of year to visit Charlotte and we are especially pleased that you have chosen to participate in the Spring Nationals. The AACA Nationals is being held during the Hornets Nest Region's Charlotte AutoFair (produced each Spring & Fall) at Charlotte Motor Speedway. Credentials for Charlotte AutoFair will be provided to each AACA Owner registering a vehicle and to each registered AACA Judge.

The Speedway is located on NC Highway 29 North in Concord, NC. The Nationals site is most easily accessed from Interstate 85, using the US 29 exit—the Speedway is about three miles North.

Another recommended route is the use of the NC 49 Exit from Interstate 485, two miles South into the town of Harrisburg — turn left onto Morehead Road to the Speedway.

Charlotte Area Attractions

Charlotte Motor Speedway is the hub of NASCAR racing facilities to be found in the larger Charlotte metropolitan area. Near the Speedway, Concord Mills Shopping Center is situated at Interstate 85 Exit 49—about two miles from the Speedway and US29 on Bruton Smith Blvd. This is one of the world famous Mills destination malls and includes a Bass Pro-Shop, many specialty stores, and a multitude of restaurants.

The LYNX Blue line (light rail train line) runs a 20 mile route from the University of North Carolina at Charlotte (UNCC) on North Tryon Street (about four miles from the Speedway) with stations through uptown Charlotte, and South to the Pineville area. There are 26 stations and the train runs every 20 minutes until 8PM, then every 30 minutes until 2AM. Uptown Charlotte also has a Gold Line streetcar route that runs all day, seven days each week.

The NASCAR Hall of Fame is on Brevard Street in uptown Charlotte near the Convention Center and the NBA Charlotte Hornets Arena is on East Trade Street. The Bank of America Stadium, home of the NFL Carolina Panthers, has a collectibles shop in the Stadium at Mint Street and Stonewall Street.

Uptown Charlotte features Discovery Place, a hands-on science museum for adults and children. Also there is the cultural campus on South Tryon Street which includes the Mint Museum Craft+Design; the Bechtler Museum of Modern Art; and the Gantt Center for African-American Arts.

Full Service Camping Choices

Apollo Mobile Home & Travel Park—Full hookup, 30 & 50 amp outlets. Shaded areas. Walk across Morehead Road and be at the Speedway in minutes. Located at 4275 Morehead Road. 704-455-2409.

Fleetwood RV Racing Camping Resort—Each site equipped with water, sewer, electric. Cable available. Restroom and shower facility on site. Located about one-half mile from the Speedway on Bruton Smith Blvd. For Reservations call: 704-455-4445.

Note: There will be NO official transportation from these two Camping locations to the AACA Nationals Field.

Registration Deadline March 7, 2025

Charlotte Nationals Summary (Check Event Schedule for Time)

Driven Show Vehicles

For Thursday and Friday, driven show vehicle owners may request special parking credentials. No trailers or campers will be allowed with this request.

Thursday

Charlotte AutoFair opens at 8 AM to the public (7 AM to Vendors) Thursday thru Sunday. The AACA Registration envelope can be picked up at the AACA Tent adjacent to the AACA Nationals Field at Charlotte AutoFair - the AACA Tent opens at 10 AM. AACA hospitality will be open at the same location.

Friday

The vehicle registration pick-up and hospitality continues at the AACA Tent adjacent to the AACA Nationals Field - opening at 10 AM. Race Car and Two-Wheeler condition runs will begin in the morning on the private paved road adjacent to the Trailer Parking area. Following in the afternoon is the AACA Judging School, which will take place at the Media Center in the Speedway Infield. See Event Schedule for time on all events.

Saturday

Vehicle registration pick-up moves Saturday to the AACA Nationals Field entrance on the Speedway grounds where vehicles may begin entering at 7 AM. The Judges Breakfast will be held in the AACA tent adjacent to the Nationals Field. All vehicles must be on the Field for judging to begin at 11 AM and remain until released by the Chief Judge at 3 PM. AACA Awards will begin at 4 PM in the AACA Tent adjacent to the Nationals Field. The Picnic will begin about 5:30 PM, just after the AACA Awards are completed.

• Credentials for Charlotte AutoFair

Credentials for Charlotte AutoFair will be provided to each AACA Owner registering a vehicle and to each registered AACA Judge.

• Vehicle Trailers and Motor Home Parking

Special locations on the Speedway grounds at Charlotte AutoFair have been set aside for Antique Vehicle trailers, haulers, RVs and motor homes. All must be self-contained. All the spaces are assigned and must be pre-registered. Credentials and maps will be issued to you for these special reserved locations. Full-time, secured trailer parking is provided Thursday night through Sunday morning at 10 AM.

• AACA Nationals Field

The AACA Nationals Field is located on the US29 side of the speedway and is totally paved.

January 5, 2022

AACA Southeastern Division Nationals Charlotte, NC -- April 3-5, 2025

Hornets Nest Region, AACA Collector Car Flea Market History 1970 - 1978

The Hornets Nest Region, AACA (HNR) has been producing a collector car flea market at various locations in the Charlotte area since 1970. Outgrowing several locations in the Charlotte area, including the original "Heart of Charlotte" motel parking lot on North Tryon Street, Hornets Nest relocated their collector car flea market to the Charlotte Fairgrounds property in 1974. The Fairgrounds property was much smaller in the 1970s than it is today. By 1976, HNR had outgrown the Fairgrounds and needed even more space. Dennis Carpenter (the largest producer of Ford reproduction parts and a Hornets Nest member) and other officers of the Hornets Nest Region were in contact with Humpy Wheeler who had recently taken the management helm at the Charlotte Motor Speedway. The Speedway needed more attractions and Hornets Nest needed more space to produce their collector car flea market.

Hornets Nest agreed to move their collector vehicle flea market to the Charlotte Motor Speedway property, beginning in April 1978. After moving to the Speedway, the Hornets Nest Region established a more formal event name - "Charlotte '78" - and the year notation was updated with the calendar. The first year required the sale of about 300 flea market spaces for a variety of antique car parts. There was no admission fee, just good impressions about the interest in collector car parts! All flea market spaces were sold at the gate beginning early Saturday morning. The flea market spaces were marked off with yellow chalk on Pit Road as they were sold. The space size did not matter too much since there was plenty of paved area available. After the first few years, the Hornets Nest Region's collector vehicle flea market grew quickly, soon adding a car corral to showcase collector cars for sale.

Ken Gilmore's 1974 Ford Truck

Myrtle: The Second Chance Truck

I grew up on a farm in Cameron, NC. My parents and I moved there in my fifth-grade year to be close to my grandparents and help with the farm. My grandfather had a tan and brown 1973 Ford F100 that served as the designated farm truck. That's me, in the photo on the right, standing on the hood. As soon as I was big enough to reach the pedals, I was driving that truck.

At first, my grandfather would let me drive him around, but one magical day, he told me to drive the truck back to the shop and get his toolbox. That was it. No one in the seat beside me, no one in the bed shouting instructions. Just me, alone, driving my grandfather's truck. I still remember how incredible that moment felt.

That old F100 wasn't anything special to the world, but it meant a lot to me. It barely had 30,000 miles, but you wouldn't call it mint. My grandfather used it as a battering ram for brush piles, backing it into trees until he decided it was "far enough." The tailgate was so dented it would never close again. The vinyl seat had to be patched with duct

tape to keep it from rubbing the backs of my legs raw. The radio? A scratchy static box—its antenna had been ripped off years before. The truck even had a bad habit of slipping out of gear at the worst times, laying down a mean black streak whenever it finally engaged.

Even with all its quirks, I dreamed of one day restoring that truck. Unfortunately, I never made that clear to my grandmother. One day, she gave it away to the young man who mowed her grass. I was silently heartbroken.

An Unexpected Opportunity

Fast forward to 2014. I was traveling for work, visiting our Raleigh, North Carolina location. When I was in town, I stayed with my in-laws in Wendell rather than a hotel.

On this particular visit, as I pulled into their driveway, I spotted my Father-In-Law, Curt, with his white 1974 Ford F100 chained to a tractor that was dragging the truck out of the woods.

That truck had once been his daily driver before being relegated to farm duty. It had been sitting in the woods at the edge of a pasture for years. Curt

had planned to sell it to a young man down the road, but the buyer never showed. Now, Curt had decided to haul it off to the junkyard for scrap.

Seeing that truck chained up like that triggered a flood of memories—the loss of my grandfather's F100, the regret of not speaking up in time. I couldn't let it happen again.

I asked Curt to wait until I could talk to Karen, my wife. She had her own history with that truck. Curt had bought it from a Highway Patrolman in Garner, North Carolina, around 1979. It was the truck he drove to work throughout Karen's childhood, and she remembered riding in it to school. To her, that truck represented the farm she grew up on and her stepdad.

When I told her what was happening, she didn't hesitate—"Don't let him scrap that truck."

I went back to Curt and offered to buy it. To my surprise, he refused.

"That truck is a rust bucket waste of money," he said. "I wouldn't sell you that hunk of problems."

But I couldn't stop thinking about it. The next evening, I tried one more time. "If you really want the truck." He finally said, "I'll sell it to Karen for \$1. But it'll be the worst dollar you'll ever spend."

I whipped out a dollar so fast I nearly threw out my elbow.

The Worst Dollar I Ever Spent?

Curt wasn't wrong.

I tell people you could stand in the bed, flat-footed on the grass below. The bed floor was more air than steel. The truck barely ran. The suspension clanked like it was held together with bungee cords. The carburetor steadily dripped fuel onto the intake. The power steering groaned like a 100-year-old man trying to get up off the ground. Curt had attempted to fix an exhaust leak with wads of JB Weld and pieces of old hacksaw blades. The floorboards had holes big enough to see daylight through.

And the worst part? When we pulled the valve covers, the lifters were completely encased in carbon and gunk. There was no escaping an eventual engine rebuild. Still, we had saved

her.

Her first bath in who knows how long involved soap, Ajax, and even sandpaper to scrape off years of dirt and what I assumed to be lichen. I worked on that truck in my in-laws' side yard for two weeks at night after work, addressing the worst drivability issues until I felt confident enough to attempt the 150-mile drive back to Charlotte.

At the time, I had never even changed my own oil. I bought a repair manual and figured things out as I went along. I mean, what could I really screw up? I only paid a dollar for the truck.

One Saturday, with Maggie, my daughter, as my co-pilot and Karen following in the chase vehicle, we set out on our maiden voyage, fully expecting a breakdown. Miraculously, we made it home.

"While We're At It" Restoration

The truck was supposed to be just a "run to the dump" beater. But one day, Karen and I were running an errand when it started raining, and water started splashing up into the cab onto her. That wasn't going to work.

"Can you figure out how to fix the floors?" she asked. We all know how this goes. Fixing the floors turned into a four-year, driveway restoration. I took a week off work, invited my dad down to help, and we got started.

See Ken's Truck next page

Ken's Truck continued

We caught a bad case of the “While we’re at it.” What began as patching a few rust holes became a full-blown restoration: full interior overhaul, floor and body rust removal, full exhaust system, engine rebuild, transmission rebuild, converted it to fuel injection, and eventually a paint job.

A good friend of mine owns a body shop, and we worked out a trade—kitchen work (my industry at the time) for paintwork. He ended up undoing a lot of my attempts, but hey, that’s part of the process.

Myrtle’s New Life

Somewhere along the way, the truck earned the name *Myrtle*. 99% chance Maggie came up with that at some point, but I can’t remember exactly why. *Myrtle* doesn’t haul trash to the dump anymore. Now, she’s part of the family—featured in weddings, photo shoots, clothing advertisements, parades, and cruise-ins.

And, as if destiny had a sense of humor, Maggie learned to drive in that truck.

History does have a way of repeating itself. I’ve always enjoyed buying and selling—horse trading, as my dad would say.

But my girls and that truck?

They’re not for sale.

Anything else?

Make me an offer.

Tim Croswhite's 1967 Mustang

Story & Photos by Tim Croswhite

Beverly Hills Ford in Los Angeles, CA, on December 20, 1966, delivered this Brand New Moss Green 1967 Ford Mustang GTA Convertible as a Christmas present.

This rare, 40-year family-owned '67 was also 1st year for "Large-Block" Mustang 390 cu engines and "GTA" was a One-Year only designation for Auto Transmission equipped GT's – About 2,200 were produced.

Research by Marti Auto Works revealed, of the 472,200 Mustangs built in 1967 this GTA was "Heavily Optioned" and qualified for "1 Of 1" recognition. Also, the Factory Base Price was \$2,698 and Invoice Sticker was \$4,601.

Rewind to 1984 when a Family member bought this GTA from same dealer. It was driven as Family Car until 1990, then was parked in his garage for another 32 years.

It collected layers and layers of dust & debris. Finally, in 2022, it was bought by a close relative, the Current owner, and shipped to Auto-Barn in Concord, NC.

Since then, and after a 2 ½ year Concours-Grade

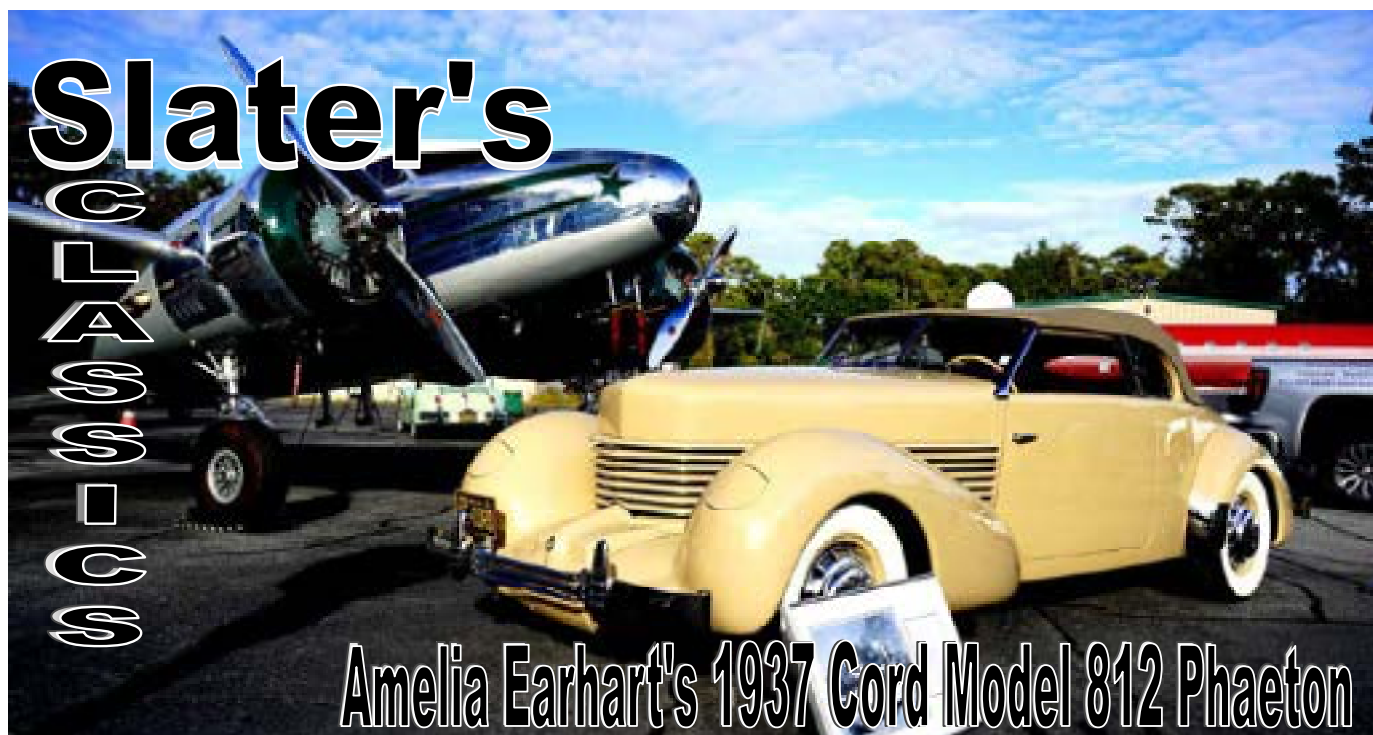

"Rotisserie" restoration by Randy Britt of Albemarle, NC, this '67 GTA, at its Sec-ond Public appearance, re-ceived a 2024 AACA Nation-al Award nomination at Huntsville, Al.

Tim's 1967 Mustang interior

Prepped for paint booth

Brad Slater

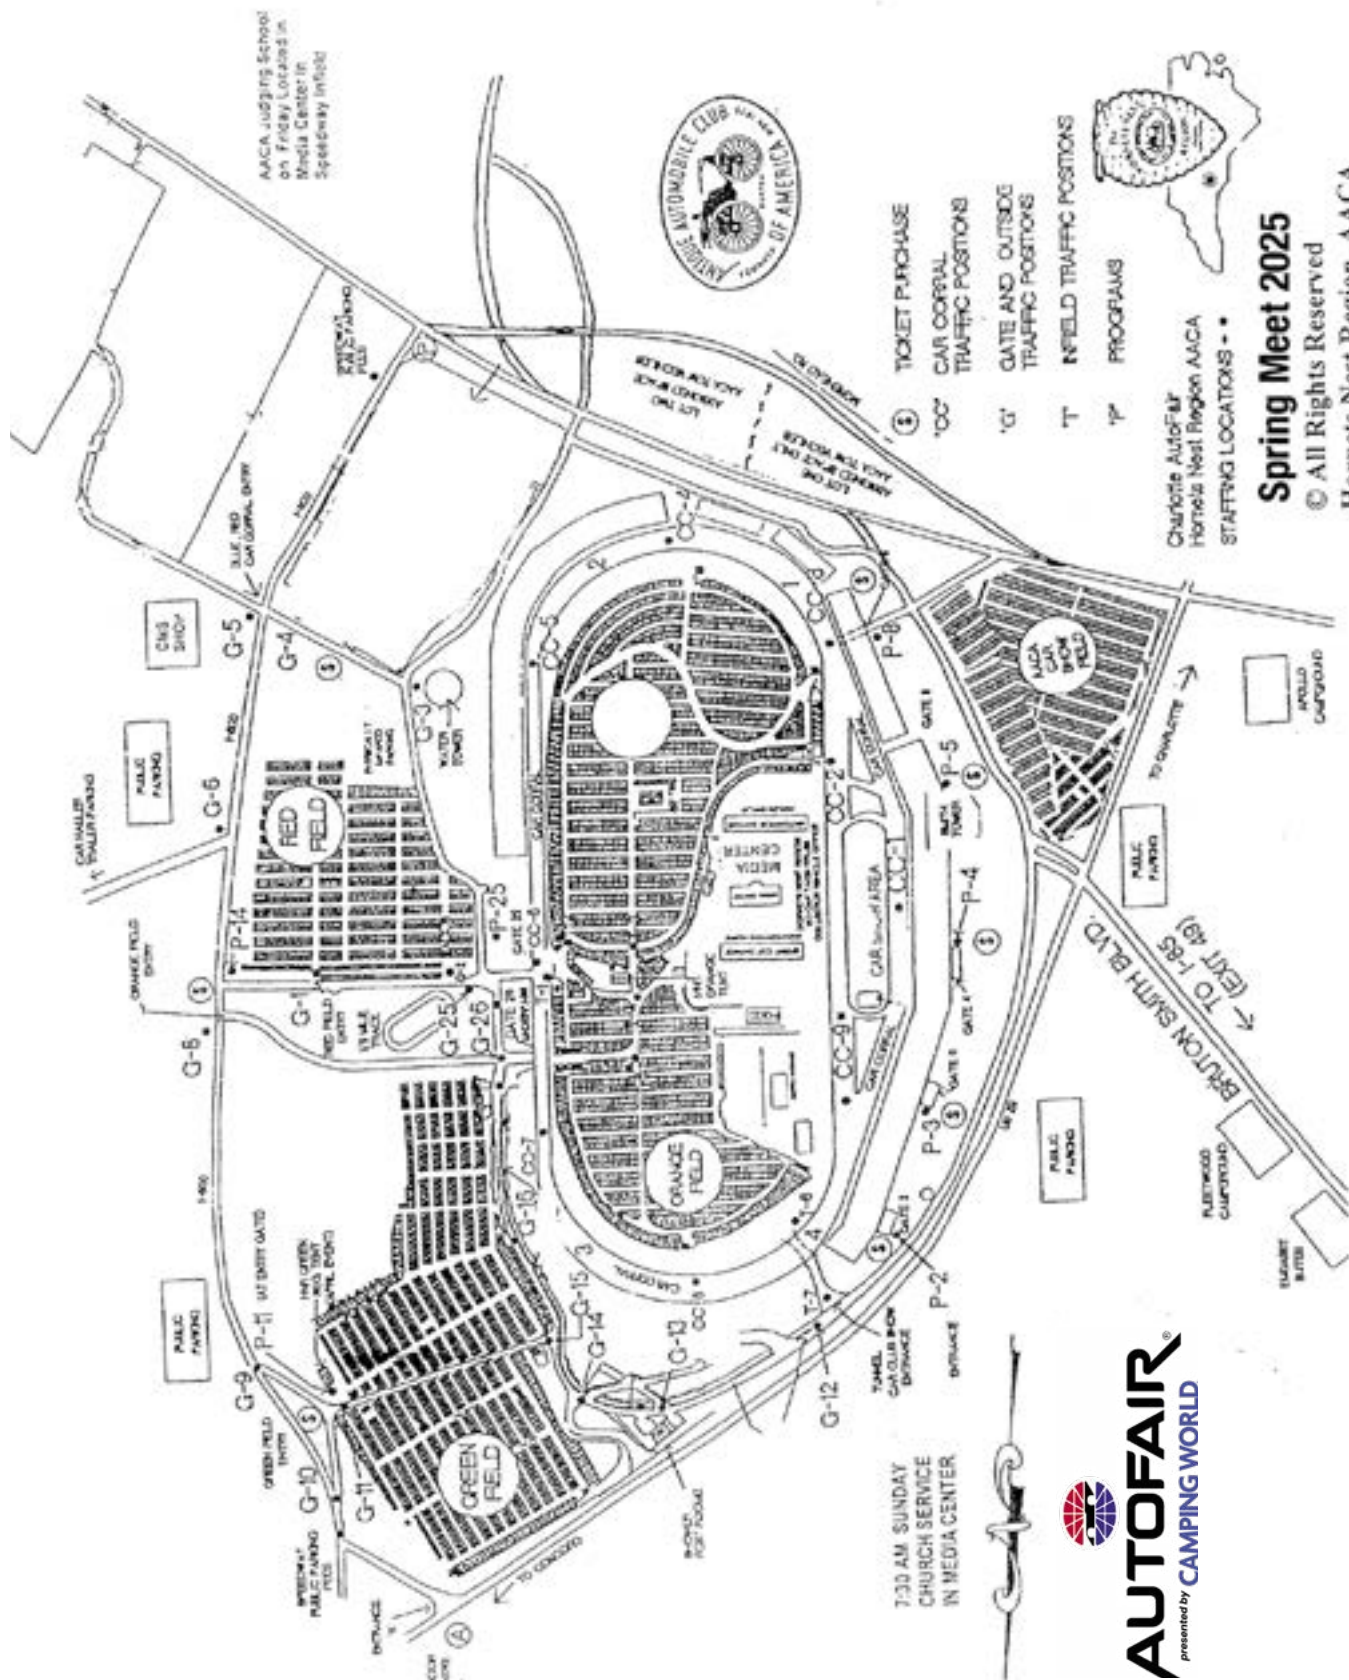

Over the next few months Members' Parade will feature stunning Brad Slater photos taken at the 2024 Hilton Head Concours d'Elegance.

One of a kind vehicles are pretty much commonplace at Concours d'Elegance events. That said, it is not every day when one happens upon a car of this provenance. The 1937 Cord 812

Phaeton on these pages was purchased new by Amelia Earhart. This 1937 Cord is now owned and loved by Jack B. Smith Jr. of Elkhart, Indiana.

Story & photos by David Peeler

The storied Simplex was one of America's most revered brands of its era and set the benchmark for big-capacity high-performance cars. They were the favored brand of the sportsman wealthy enough to afford one. Placing an enormous T-head power plant into a dual-chain drive chassis was a formula that would appease the most discerning enthusiast craving speed and power at any price. Today the Simplex maintains its standing as one of the most desired and difficult to acquire cars of its era. Never has there been a period in our hobby where this marque wasn't top on any collectors' list. A look at the list of collector owners over the years is a veritable who's who of the hobby. Owners include Briggs Cunningham, Henry Austin Clarke, Smith Hempstone Oliver, George Waterman, Miles Collier, Otis Chandler to name just a few. Not surprisingly it is Simplex that holds the world's record for the most expensive American car of its era ever sold. Few other cars offer the satisfaction of effortlessly thundering down the road with what feels like limitless power and heaps of charisma. For a collector looking for one car that epitomizes the excitement and thrill of this special era, a 50hp chain-drive Simplex checks all the boxes and is not an experience that can be duplicated with a lesser car.

The new 50 hp Simplex was introduced to the public and despite its breathtaking price tag of \$5750 they immediately found favor with sporting car enthusiasts. Unlike some of Simplex's competition, the enormous engine was not designed to lug around heavy coachwork as this car was designed from the ground up for driving performance. Simplex quickly cemented their reputation with success in motorsports. Unlike many builders, Simplex competed with their standard production cars. Winning the Brighton Beach 24 hours and victories at Lowell and Fairmont all bolstered the Simplex reputation. This was a race car for the street and few cars in the world could rival them for their sheer performance.

Simplex would continue to improve the mechanical design of their cars. For 1913 a major change in engine design was introduced by incorporating features that proved successful in the 38hp Simplex model. A lengthened stroke and improved cylinders made the engine more modern and improved the already industry leading low-end power. Improvements to the drive line eliminated stress on the aluminum transmission case and added a separate differential case for the chain drive jack shafts and inboard brakes. These changes great-

ly reduced issues that plagued the earlier models. Fortunately, these subtle changes were made while keeping the Simplex trademark dual-chain drive rear end.

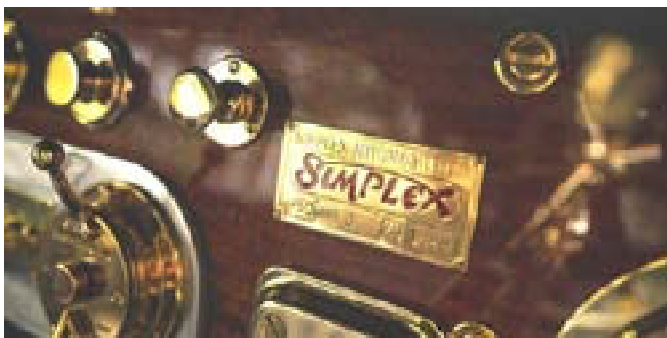

For 1913, the improved Simplex, like its European counterparts, was primarily offered only as a chassis to be fitted out by the clients coach builder of choice. Simplex maintained a close association with a handful of the finest American builders. Quinby, Demarest, Haley and, most notably, Holbrook were the usual choices. Simplex, to further show their association with expensive European marques, abstained from the usual New York Auto show and instead, displayed at the Importers' Auto Salon, held in the Hotel Astor.

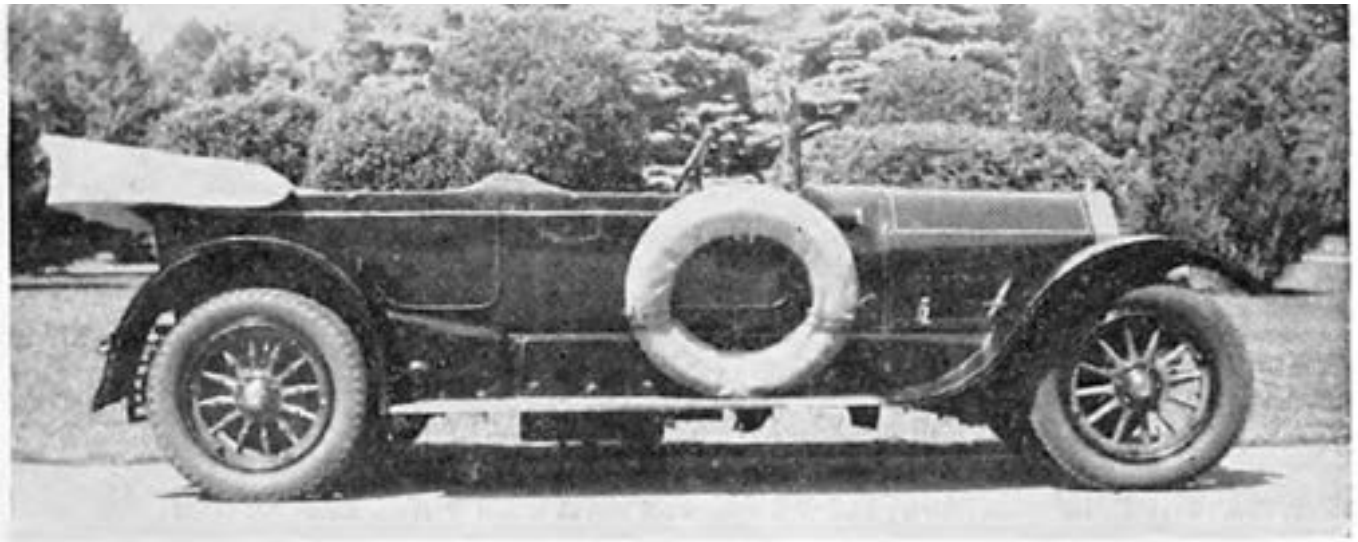

At 27 years of age, Frederick T. Frelinghuysen ordered this Simplex in early 1914. The prominent Manhattan resident was grandson of Frederick T. Frelinghuysen, the United States Secretary of State for President Chester Arthur. Young Frederick was a keen motoring enthusiast adding the Simplex to his Park Avenue garage that included a T-head Mercer, a 40hp National, Lancia and SGV. Mr. Frelinghuysen was exactly the type of sportsman Simplex catered to. He commissioned the Holbrook Company of New York to craft a sleek, modern body to adorn the Simplex. Holbrook maintained the finest reputation in craftsmanship and most importantly superb styling. The resulting custom body reflected design trends in high end sporty, enveloping bodies. The body featured nice touches like the integrated side lamps faired into the low sleek cowl, conveying the sporty nature of Simplex in a clean uncluttered shape.

It is unclear how long Frelinghuysen owned his prized Simplex. The year 1916 is the last published record, but 1458 reemerges in 1951 in the hands of Wyckoff, New Jersey collector Al Hood Jr - only 27 miles from its original Park Avenue garage. In 1951 Hood advertised the car for sale, being partially restored but decided instead to keep the car and finish the restoration. By 1952 the car was finished and being shown at vintage car events. Newspaper stories from 1952 quote Al as saying the car had belonged to "Diamond" Jim Brady which seems spurious given Brady's death during Frelinghuysen's ownership. Hood would ultimately sell the car in 1953 to noted industrialist and later President of the Antique Automobile Club of America, Mahlon Patton. Patton would further improve the restoration done by Hood. Photos in 1953-54 show the Simplex looking in

Former AACA President Mahlon Patten drove car on 1957 Glidden Tour

1914 Simplex, Ser. No. 1458, rated hp. 50, develops 68 at rear wheels and will do 70 mph., owned by M. E. Patton, Elizabethtown, Pennsylvania.

top form with polished paint and new stripe work. The car would become the pride of Patton's collection and see frequent use during his ownership. In 1957 Mahlon's Simplex completed the 435 mile Glidden Tour Revival. In 1961, while serving as AACA President, Mahlon drove his Simplex 700 miles round trip to participate in an event in Ohio. Later that year he led another Glidden tour in his beloved Simplex. In 1965, he lent the Simplex to an English friend, Frank Davis, who participated in the tour that year. The 1969 Glidden tour totaled 1100 miles in the Simplex — now earning a reputation as one of the most reliable and best performing tour cars out there. To mark his 20 year anniversary of owning the Simplex, Patton drove over 1600 miles to participate in the 1973 Glidden tour. That year, Henry Austin Clark judged the car the finest Simplex on the tour. The Simplex continued to be a regular tour car until Patton finally sold the vehicle to Manny Souza of Rehoboth Massachusetts. Manny quickly kept up the touring tradition and entered the car on the 1985 Glidden tour. The car would reside in Manny's superb collection of brass era automobiles until we acquired it in 2018.

Immediately after acquisition the Simplex was entrusted to marque specialist David Staadt's Simplex Garage for an assessment and service plan. Staadt, a prominent Simplex restorer, enjoys an excellent reputation for his high-quality work and ability to get a car sorted for touring. A two-phased restoration plan was devised and a full mechanical rebuild was begun.

The engine was completely rebuilt with all moving parts removed, checked for wear and cracking, and replaced as needed. The crankcase was fitted with fresh bearings and cylinders were fitted as well with new pistons and connecting rods. The carburetor and magneto were also rebuilt. The radiator was fully serviced and original Rushmore starter generator was rebuilt and returned to the car. The differential was rebuilt along with the inboard brakes and the multi disc clutch re-lined. New sprockets were machined and fresh 80 gauge chains fitted.

With the fresh mechanicals, the Simplex embarked on yet another Glidden tour in 2019, completing over 500 miles and performing spectacularly. After the tour the car went back to Staadt's for the second phase of restoration. A full cosmetic res-

toration was begun now that the mechanical side was in top order.

On initial assessment and disassembly, it was discovered that the body had never been off the chassis. The chassis number 1458 was found stamped in the hood bracket as well as the frame rail. The aluminum body skins and wood framing were found to be in excellent order. Having had several repaints over the years, the car was now stripped to bare metal and finished to a high standard keeping the dark red livery it was known for. The cabinetry was refinished and the interior received fresh leather upholstery matching the original design. The brass was sent to Britten's Brass Works for restoration.. Antique Carriage in Nappanee, Indiana handled the painting and trim work. The car now has fresh tonneau cover, top boot, and side curtains.

The Simplex only had a few

deviations from original specification, most notably the upgrade to full set of 100mm Rudge-Whitworth wheels and hubs - an expensive period option offered by Simplex in those years. This change looks great on this car and makes any wheel and tire changes a quick and easy procedure.

The resulting restoration has received universal accolades. 2019 VMCCA Horseless Carriage National Award, AACA First Junior and Senior awards (2022, 2023), 2022 Hilton Head Concours Best in Class, and 2023 Amelia Island Concours Best in Class, AACA First Grand National & AACA National Award (2024).

After judged showings this year at AutoFair (April) and Grand National Meet (Dayton in July) the car will return to the tour circuit where it feels most at home.

Cliff & Brenda Grayson Collection

Story & Photos by Darrell Page

Amy Tetrault organized a visit to Cliff & Brenda Grayson's on Saturday, October 26, 2024 in Midland, NC.

Approximately 50 HNR Members attended. The older Farm Property was beautiful with over 30 acres of trees, ponds, barns and pretty green grass. The weather was perfect, not too hot and just cool enough.

Cliff gave a personal tour of his car collection, storage building and new work garage. All of the cars were awesome and clean, just like the storage building, work shop and the entire property. All of the vehicles in the Grayson Collection have a story. Several of them were formerly out of the Fletch Little Collection, so their Hornets Nest tradition lives on. The 1937 Ford Club Coupe was discovered by Cliff's Father, Clifford Grayson. Cliff's Dad was a fireman. It was during a fire call at the tank farm in Charlotte that he discovered the unrestored Ford in a building on the property. Cliff's Dad contacted the owner to make the purchase.

Brenda Grayson has her own little building for her 'private' time. She named it the 'She Shed'.

Lunch was sandwiches from Jersey Mike's and Brenda baked cakes and other deserts.

It was a great time to visit, see some very nice cars, and have fellowship with other Hornets Nest Members.

Thank You Cliff & Brenda!

Parade For Veterans

By Jerry Clemmons

Above: Neal Sparrow welcomes participants & leads in prayer of thanks for Veteran's contribution to the Freedoms we all enjoy in the USA.

Neal & Sue Sparrow have been doing a great job organizing the Parade For Veterans in downtown Charlotte, North Carolina for as long as I can remember. Thirteen cars and trucks and around thirty Club Members and Veteran friends participated in this year's Event.

Participants met at 2127 Wilkinson Blvd. this year, the gathering location prior to the Event. Neal Sparrow shared instructions on line up location in downtown Charlotte and afterwards led participants

in a prayer of thanks for freedoms and safety we all share because of our Veteran's sacrifice.

The weather was perfect and the streets of Charlotte were lined with thousands of gleeful observers in attendance.

The old cars represented by the Hornets Nest Region were a big hit with the crowd as we passed by. The Parade For Veterans organized by Neal & Sue Sparrow is a special Event that gives participants a warm feeling. See you next year!

The Cars America Lost Packard

Hollis' 1941 Packard 120. Purchased from my late friend, Jim Raines at the time when he was AACA president. The beautiful Packard has accumulated only 39K miles since new. The little yellow window sticker is for a Pennsylvania in-spection dated 1960.

By Hollis Rule

Back in the Day...

It was the fall of the year. On my three block walk home from school I passed a house with a pear tree in the yard. The pears were ripe and some were falling to the ground. I'll never forget the sweet aroma of those pears. But because of my upbringing, I would never have even thought of picking up one of the pears and eating it, because that would be stealing. It was toward the end of the Great Depression, and World War II was on the horizon. But that didn't mean much to me. Like many of us who were born during the depression, that was the only life we knew. And as for the war erupting in Europe, my mind was not on international affairs. After all, I was only in kindergarten.

My greatest interests were playing with the other kids and just having fun. However, even

at that early age, I loved cars. As a matter of fact, cars were a way of life for our family. My parents had owned an active dealership before the depression and when America's finances collapsed, dad continued in the automobile business with a garage and a separate body shop. Many times on the weekends I would find myself playing in Dad's body shop. For me personally, it was the body shop that got my attention.

Even at that age and even earlier, I loved to check out car styling, more than the mechanical aspect of the cars. That has continued throughout my life, but that's just me. Whenever I was at the shop, I would watch Dad and his employees work, removing dents, replacing parts and painting, all the while, I would

spend countless hours just admiring the cars.

A Little about Me

I grew up in Parsons, a railroad town in southeast Kansas. Since it was a blue collar town, and in the midst of the depression, most of the cars were Chevys, Fords and occasional Plymouth or Dodge. Model "A"s were everywhere and quite often I would see a Model 'T' chugging down the street. Rarely would I see a high-end car, although there were a couple of doctors in town that owned a Buick or a Chrysler. To the best of my knowledge, none owned a Cadillac or even a Lincoln. Even if they could afford them, that would be considered flaunting your money. Their patients or customers would tend to avoid them, thinking they were making too much money, and that money they felt, was coming from

their pockets.

Each day as I walked home, I would pass the house with the pear tree. One day sitting at the curb next to the tree was a car different than any I had ever seen. “The people must have visitors from out of town”, I thought. I had to stop and check it out. Unfortunately, the car was covered with road dirt and mud from traveling, not uncommon because of the Kansas roads of that day. So my first impression left something to be desired. “It has to be a late model”, I thought, “but what kind of car is it?” Even to this day, I remember the car distinctly. It was a coupe, black in color and with an upright grill and unusual styling. The car was obviously new or near-ly new, but the styling seemed older. Today, we would refer to it as traditional. I thought “what an ugly car – I can’t wait to tell my dad”!

Dad’s Reaction

That next Saturday when I spent the day at my dad’s shop, I couldn’t wait to tell him about that ugly car. I must have been able to describe it rather vividly, because when I finished, dad

exclaimed “Why Son that was a Packard. That’s one of the finest cars ever built!” I was a bit taken back by Dad’s response. What I thought was ugly he thought was a beautiful and outstanding car. However, I continued to play around the shop, not thinking much more about it.

A Different Outlook

The next week, as I walked home from school I would always stop to take another look at the Packard. The car was there for the next week or two and somewhere along the way it got a nice wash job. Each day, as saw it, I guess I began to see it from my dad’s viewpoint. In retrospect, the Packard was most likely a ’36 or ’37 junior series coupe. Every day the traditional styling began to add interest instead of detract from the car’s appeal. The upright, louvered grille had more beauty each day. By the time the car left town, I missed it. To me, it had become a nice diversion on the walk home!

The Early Years

Near the turn of the twentieth century, engineers, machinists, and back yard tinkerers just couldn’t resist the temptation to build a “horseless carriage”. As far East as Massachusetts and throughout the upper Midwest, men were in their shops, their barns, and sometimes even in their wives kitchens, tinkering with gasoline engines. Many people bought an engine and adapted it to their family buggy. Endeavors to build automobiles were sometimes in the most unlikely places. There were literally thousands of attempts to build and market cars. Most ended in failure simply because of a lack of funds. However, some of the earliest successes could be claimed by men such as Charles and Frank Duryea, Elwood Haynes, the Apperson brothers, Ransom Olds and Alexander Winton.

By the time the twentieth century rolled around, it was becoming obvious there were at least three American cities that could become the hub of activity for the infant auto industry. One was Detroit, one was Indianapolis the other Cleveland Ohio. Arguably, it first appeared that Indianapolis might be the winner. In the early days, there were more fledgling car builders in Indianapolis than

all of Michigan. However, in the earliest of days, Alexander Winton of Cleveland was unquestionably the king of the hill. By 1898, Winton was in full swing. He and his team were producing cars at the rate of almost two every month, an astounding number for the times. That year, Winton produced twenty-two automobiles, but it would be his thirteenth car that would change automotive history.

The Packard Brothers

Nearing the turn of the twentieth century, the horseless carriage craze was not the only thing changing America. Some fifteen years earlier, “The Wizard of Menlo Park” Thomas Edison had developed the first commercially successful incandescent light bulb. The new bulb not only changed how Americans lived, but opened the door to new industry as well. Jumping on the bandwagon were the Packard brothers, James Ward and William Doud. They began manufacturing incandescent carbon arc light bulbs and other electric goods in 1890 and had a thriving business by the turn of the century.

With plenty of money to spend, James Ward Packard decided he wanted what most would have called a rich man’s toy. He wanted an automobile. Knowing he wouldn’t have to travel far to buy one, he headed to Cleveland, some 50 miles west, to the largest builder of cars in the area, Alexander Winton. On August 13th, Packard bought the 13th car Winton produced that year and headed back to Warren, Ohio, where he lived and had his factory.. Perhaps to the

A 1898 Winton ... James Ward Packard purchased car serial number 13. Courtesy the Crawford Auto Museum

superstitious, that combination of two thirteens might have been an omen. Heading home, the vehicle James Ward thought would give him such pride and pleasure turned out to do just the opposite. Once on the road, he encountered repeat-ed problems. The drive chain broke, the engine overheated, and tires failed, just to name a few. At early dawn the next day, James was seen covered with mud, being towed into town behind a team of horses. It had to be a humiliating experience to someone as wealthy and prominent in his

community as Packard.

After getting some rest, and fuming for awhile, Packard was determined to resolve the problems with his newly purchased Winton. For him, improving anything mechanical was second nature. As a young man, he had attended Lehigh University, receiving a Bachelor of Science degree in mechanical engineering. While at Lehigh, he was an honor student and did such things in the fledgling electricity field as to develop a system to open and close his dorm door and windows automatically.

THE CLUB

The Antique Automobile Club of America (AACA) is the country's oldest and largest automotive historical society. A Pennsylvania 501(c)(3) nonprofit corporation, it is dedicated to the preservation, restoration and maintenance of automobiles and automotive history. Founded in Philadelphia in 1935, its membership has grown to over 55,000 members from all parts of the world. AACA holds country-wide competitive Nationals (meets) and non-competitive tours. These are on a divisional basis offering a program within everyone's reach. Tours and activities relating to the hobby are offered, including the Revival AAA Glidden Tour®, Founders Tour, Vintage Tour, Reliability Tour, Sentimental Tour and Divisional Tours. The Annual Convention features a trade show, seminars and the National Awards banquet.

AACA is proud of its relationship with the many historical organizations devoted to similar objectives the world over. The Club, through its national office, publications and membership, aids individuals, museums, libraries, historians and collectors dedicated to the preservation of automotive history.

VEHICLES

Motor vehicles of all types, 25 years or older, are grouped for competitive purposes into many classes according to age and mechanical features. AACA has a comprehensive judging system that allows members to earn special awards for their vehicles. AACA also recognizes original cars, Historic Preservation of Original Features (HPOF), and unmodified 25 year and older vehicles that are driven, Drivers Participation (DPC). The club also recognizes classes of motorcycles, trucks and documented race cars. Further details can be found in our judging guidelines which are available online at www.aaca.org.

THE MAGAZINE

AACA's official publication *ANTIQUE AUTOMOBILE* is the country's foremost automotive historical magazine. Amply illustrated, it is distributed bi-monthly to all members. It contains many fine historical articles, Nationals (meet) and tour accounts, technical articles on restoration and other material. In addition, it includes commercial and classified advertising. Advertisers may obtain a rate card from Antique Automobile Club of America, National Headquarters, 800 W. Hersheypark Dr., Hershey, PA 17033.

REGIONS AND CHAPTERS

There are approximately 400 regions and chapters chartered by the Antique Automobile Club of America worldwide. Regions and their chapters are administered in an autonomous manner holding their own meetings, collecting local dues and conducting runs, meets and other events under the direction of the respective elected officers. Membership in the national Antique Automobile Club of America is a prerequisite to joining a region or chapter.

Founded in 1981, the AACA Library & Research Center provides historical research concerning the origins of and the development of motorized vehicles of all types. The library will assist hobbyists in the restoration and preservation of their antique vehicles. The AACA employs a full-time library staff to better serve the membership. Photocopying (including color) and research services are available through the Research Center at nominal fees. Members qualify for 2 hours of free research. Visit www.aacalibrary.org or call 717-534-2082.

**AACA
Spring Nationals
April 3-5, 2025
at
Charlotte Speedway
Sponsored by
Hornets Nest Region**

Meet the artist, Dan McCrary, whose work is featured at Charlotte AutoFair. You will find some of his best work for sale at the event.

Dan McCrary

"The first time I ever drew a box on top of a pair of wheels was at the age of 5 or 6, having been inspired by my first few trips to the old Raleigh, (N.C.) Speedway in the mid fifties. Or maybe it was watching Dad wax the Buick. While still in grammar school, I began spending spare time and my allowance at the magazine racks and discovered that people were racing, chopping, lowering, modifying, and generally having a grand time with cars of all descriptions. And I was still drawing — flaming rods, radical customs, and my own "cars of the future."

"Remember the guy sitting next to you in junior high school drawing cars instead of paying attention in class? That was me.

In high school in Greenville, N.C., I discovered Rock 'n' Roll, got a guitar, and proceeded to have a fling with the music business that lasted quite a few years. Somewhere in the middle of all this, I spent a couple of years as an art major at East Carolina, and a couple of years in the army. (Some guys get malaria in the jungle — I picked up the dreaded Alfa-Romeo virus in Europe.)

After the army and a few more years of music, I went to work in a music store. Being spoiled by so many years of self employment before, it wasn't long until I started drawing cars again, doing "car portraits" and scheming to go full time into automotive art. In a few years, I was able to "quit the day gig," as they say.

And here I am, over ten years later, still going to races, concours, and even prowling in junkyards — drawing cars, and getting paid for it.

"What a country!"

Kevin Smiths 1967 Olds 442

Kevin and Lisa Smith have been very active Hornets Nest Region Members, driving their beautiful Oldsmobile to most Club Events since joining our Region two years ago.

The couple's fine 1967 Oldsmobile 442 attracts a great deal of attention at Club Events. The Olds took People's Choice Award at this year's Blue Ridge Community College Show and received special recognition at this year's North Carolina Region Show in Spencer.

Kevin's interest in the Oldsmobile brand can be traced back to his childhood in Buffalo, New York. He was twelve years old when his Grandmother purchased a 1966 Oldsmobile Cutlass Holiday Coupe. Kevin fell in love with that car. Every time his Grandmother would visit Kevin wanted to go for a ride in her car.

Now that Kevin has retired and moved to North Carolina, he has a car that brings him back to when he was twelve years old, riding with his Grandmother.

Kevin found his 442 Olds in nicely restored condition during an internet search two years ago. He has made a few changes to the vehicle. Most of these involved changing out hose clamps, hoses, belts and the like...bringing the car up to factory correct condition.

Powered by a 400 C.I. V8 engine, the running gear on the 1967 442 Oldsmobile consists of four speed transmission and 342 geared differential.

The production numbers on 1967 442 Oldsmobile Four Speed Convertibles were limited to 1185.

As stated above, Kevin's Olds was shown in Spencer, North Carolina where it was judged by AACA Rules and won awards. That said, the car should do very well when shown in the next AACA Southeastern Spring Nationals in Charlotte, North Carolina.

Hornets Nest Region Antique Automobile Club of America

Contact: 9307-H Monroe Road
Charlotte, NC 28270
704-841-1990

The Hornets Nest Region is a chartered region of the Antique Automobile Club of America (AACA). The AACA -- founded in Philadelphia, Pennsylvania in 1935 -- is now headquartered in Hershey, Pennsylvania. Today the Antique Automobile Club of America organization includes almost 60,000 members world-wide.

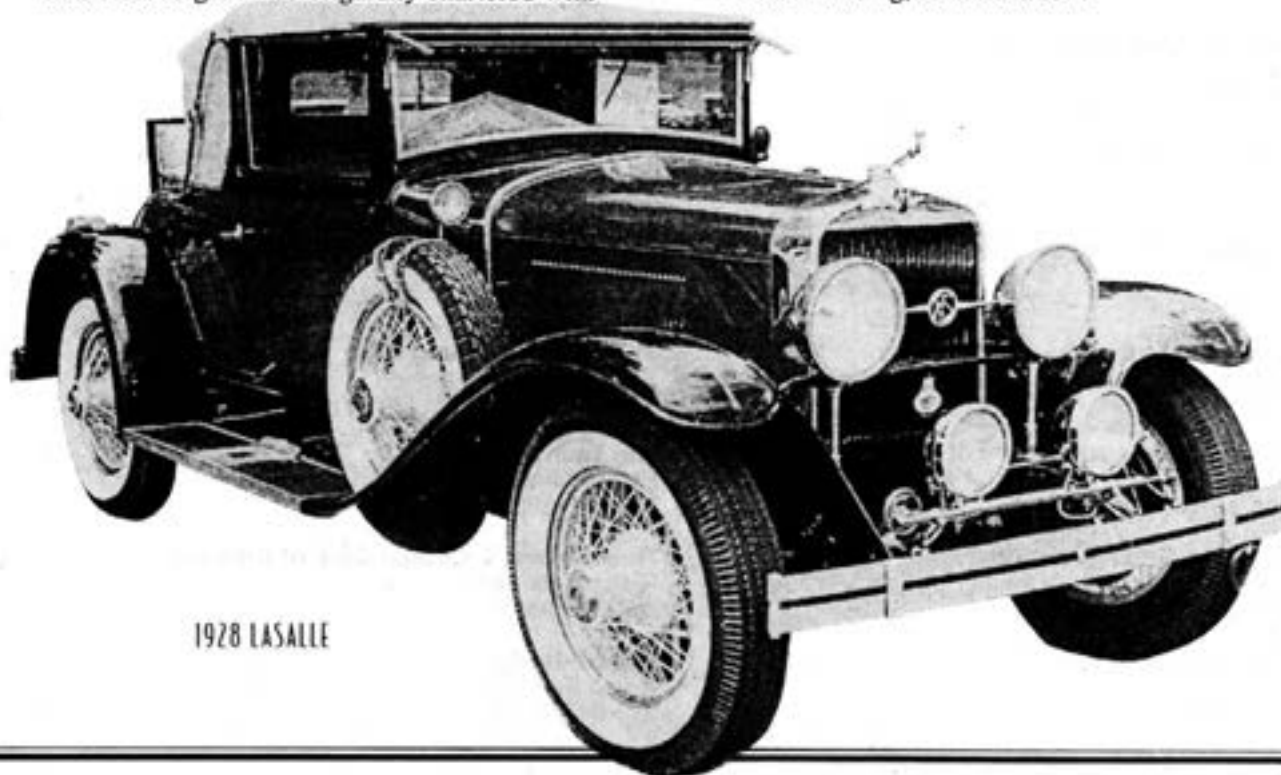

The Hornet's Nest Region was chartered in 1967 by the National AACA during their Hershey meeting. The Hornets Nest Region was originally chartered with

twelve members and has now grown to over 500 members in the metropolitan area of Charlotte.

The general goal of the AACA is to restore vehicles twenty-five years old, or older, to the condition as it left the factory when new. Restored vehicles are judged on the following basis: interiors restored using the original factory type materials and design, including all chrome and metal finishes; exteriors restored using colors and paint finish original to the vehicle, including all chrome and metal finishes; engine compartments restored to new condition with the type of engine original to the vehicle, including all accessories; chassis restored to new condition with all components as original.

The Hornets Nest Region, AACA, is dedicated to the goals of the National AACA and the hobby of restoration, preservation and family involvement with vehicles that are twenty-five years or older.

Every Hornets Nest Region family has an antique automobile, a project antique auto underway or is involved in some other facet of the hobby, such as collecting license plates, miniature auto reproductions, or antique auto advertising, to name a few.
